

# **DETWILER INCIDENT CA-MMU-014474**

## **INCIDENT ACTION PLAN**

### **OPERATIONAL PERIOD**

**7/23/2017 0700**

**to**

**7/24/2017 0700**

## INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b> <div style="text-align: center;">DETWILER</div>	<b>2. Operational Period:</b>	Date From: 7/23/2017    Date To: 7/24/2017 Time From: 0700    Time To: 0700																				
<b>3. Objective(s):</b> <u><b>Management Objectives</b></u> -Provide for and maintain public and first responder safety by utilizing the incident safety analysis process. -Be fiscally responsible for all management and suppression actions. -All management actions and efforts will be focused on serving, safeguarding, and protecting the citizens, cultural and historical resources of Mariposa and Tuolumne Counties. -Ensure timely notifications as evacuations occur and that the repopulation plan is carried out in an efficient and organized manner. -Stay committed to interagency coordination and collaboration through honest and transparent communication.  <u><b>Control Objectives</b></u> -Keep the fire East of Merced County -Keep the fire South of Greeley Hill Road -Keep the fire West of Highway 140 and Highway 49 -Keep the fire North of Road 600  <u><b>General Situational Awareness:</b></u> -MAINTAIN L.C.E.S. AT ALL TIMES. Safety zones and escape routes are mandatory. -Ensure all personnel maintain situational awareness. -Rolling material and steep terrain. Remember to maintain good footing. -Keep your hydration up by drinking water and electrolyte beverages. Avoid energy drinks. -Maintain good communications with your supervisors, adjacent forces and crew members. -Maintain awareness of fire weakened trees, ash pits, and burned-out stump holes.

# Fire Weather Forecast

**FORECAST NO:** 5  
**PREDICTION FOR:** Sunday  
**SHIFT DATE:** July 23, 2017  
**FORECAST ISSUED:** 1900, July 22, 2017

**NAME OF FIRE:**  
**UNIT:**  
**Incident Meteorologist:**

**Detwiler**  
**Madera-Mariposa-Merced**  
**Tom Wright (240-778-5304)**

**DISCUSSION:** Sunny, hot, dry weather continues Sunday. Isolated thunderstorms are expected to the east of the fire over the Sierra Mountains, so gusty outflow winds from the east are possible over the fire during the afternoon and evening. Otherwise, the wind regime will be slope driven through much of the day except for west-northwest winds over exposed areas.

## SUNDAY:

- **WEATHER:** Mostly sunny and hot.
- **WIND (20 FT):** Mid-slope and below: downslope 1-3 mph through 1000, then becoming upslope 2-6 mph. On the ridges and exposed areas: west-northwest 3-6 mph. Gusty east outflow winds possible afternoon and evening.
- **MAX TEMPERATURES:** 100-106
- **MIN RH:** 14-18%
- **CHANCE RAIN:** 0%    **LAL:** 1
- **INVERSION:** Mid-slope, breaking by 1000 hrs.
- **MIXING HEIGHT:** Near mid-slope in the morning, then rising to 7000 ft after 1000 hrs.
- **TRANSPORT WINDS:** Light and variable through 1000 hrs then becoming west-southwest around 5 mph.

## SUNDAY NIGHT:

- **WEATHER:** Clear.
- **WIND (20 FT):** Becoming downslope 1-3 mph after 2200. Above the inversion: Northeast around 5 mph.
- **MIN TEMPERATURES:** 66 Valleys to 72 Ridges
- **MAX RH:** 30% Ridges to 40% Valleys
- **CHANCE RAIN:** 0%    **LAL:** 1
- **INVERSION:** Mid-slope developing after 2200

## MONDAY:

- **WEATHER:** Sunny and hot.
- **WIND (20 FT):** Mid-slope and below: downslope 1-3 mph through 1000, then becoming upslope 2-6 mph. On the ridges and exposed areas: west-southwest 3-6 mph through 1400 hrs, then west-northwest 4-8 mph. Gusty east outflow winds possible afternoon and evening.
- **MAX TEMPERATURES:** 98-102
- **MIN RH:** 17-20%
- **CHANCE RAIN:** 0%    **LAL:** 1
- **INVERSION:** Mid-slope, breaking by 1000 hrs.
- **MIXING HEIGHT:** Near mid-slope in the morning, then rising to 7500 ft after 1000 hrs.
- **TRANSPORT WINDS:** Light and variable through 1000 hrs then becoming south-southwest 5-10 mph.

## 3-5 Day Planning Outlook:

**Tuesday:** Clear. Lows 62-68. Max RH: 40-50%. Highs: 94-98. Min RH: 20-25%. Winds: WNW 3-6 mph.  
**Wednesday:** Clear. Lows 60-66. Max RH: 45-55%. Highs: 94-98. Min RH: 20-25%. Winds: WNW 4-8 mph.  
**Thursday:** Clear. Lows 66-72. Max RH: 35-45%. Highs: 98-103. Min RH: 17-20%. Winds: WNW 5-10 mph.

Android

### QR Codes to Fire Weather Calculator App (for taking weather observations)

- Fill out all fields, tap calculate, then send/share observation
- Please email kml and csv to [detwilerobs@gmail.com](mailto:detwilerobs@gmail.com)
- No signal? The app stores the obs for you and will queue them up for transmission when you have a signal

iPhone

# FIRE BEHAVIOR FORECAST

FORECAST NUMBER 6	TYPE OF FIRE Surface
FIRE NAME Detwiler	OPERATIONAL PERIOD July 23, 2017 24 HOUR
DATE ISSUED July 22, 2017	TIME ISSUED 2000 HOURS
UNIT: CALFIRE Madera-Mariposa-Merced	SIGNED  Geoff Marshall FBAN-t

## INPUTS

**Weather Summary:** Hot and dry. Very persistent conditions. Possible thunderstorms East of the fire over the Sierras. See Fire Weather Forecast

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL

The fire is primarily burning in a mix of grass, grassy-oaks, and brush. If fire continues to the North and East it will get into pockets of tree mortality. These areas will create additional spotting issues and a large dead and down component ready for consumption. We are in a persistent forecast and should see burning conditions similar to the last few days. We have seen a general slowdown in activity due to a reduction of fine dead fuels in the North and North-East sides of the fire and the brush needing fine dead fuels, or preheated to make a run. Potential for spot fires remains very high. Out flows from possible thunder storms along the eastern Sierras may dramatically increase fire behavior and change direction of the fire.

#### Optimal Alignment, Peak Burning Conditions

Probability of Ignition = 80-100%

Spotting Distance= up to 1/4 Mi.

ROS 2 - 2.5 mph

Fine Dead Fuel Moisture = 2%

10hr Fuels= 4-5%

Flame Lengths 25 feet plus in brush

#### Average Conditions

ROS: Grass .1-3/4 mph, Brush .1-1/2 mph Flame Length: Grass 1.5-6 feet, Brush 2-14 feet

## SPECIFIC

### BRANCH I, II, III, VI

No fire progression is expected. Spot fires outside the line have potential for rapid growth. Dust whirls have high potential to carry spots over the line.

### BRANCH IV

Terrain is very steep and the area has fuels that may have over 90 years of accumulation.

### BRANCH V

Little to no progression is expected. Fire is burning into the old Telegraph scar and vegetation is considerably lighter. Small isolated interior runs are possible. Out flows from possible thunderstorms east over the sierras may cause a pronounced increase in fire behavior and a change in direction following major drainages.

### BRANCH VII

Fire is working its way East Following the N. Fork of the Merced River mostly terrain driven and following diurnal winds. Out flows from possible thunderstorms east over the sierras may cause a pronounced increase in fire behavior and a change in direction following major drainages

## AIR OPERATIONS

Watch for outflows from possible thunder storms over the eastern Sierras.

Sunrise 0556

Sunset 2016

## SAFETY

QR Code for Tree Mortality Map in Madera – Mariposa – Merced Unit

A sudden decrease in temperature and/or rain may indicate imminent thunder cell collapse

## **GENERAL SAFETY AWARENESS**

**MANY HAZARDS AND RISKS REMAIN**

### **Watch Out**

- Watch for abandoned Mine Shafts, LPG tanks, Hazardous Materials
- Tree Mortality, Fire weakened trees, Snags, Valley Oaks
- Unstable structural members and free standing chimneys

### **Mitigation**

- Mark, GPS and Flag Mine Shafts. Make the hazard known. Report to Supervisor
- Look up to live-Look up, Look Down, Look all around
- Always consider the values at risk and adjust actions accordingly

## **FIRE BEHAVIOR**

**THE YEAR AFTER A DROUGHT IS THE YEAR TO BE AWARE OF**

### **Watch Out**

- Increased annual grass crop
- Dead tree crowns will increase ember production when fire is established at the tree base
- Northerly morning winds switching to westerly in the afternoon

### **Mitigation**

- Utilize all required PPE when on the fire line
- Preplan for short and long range spotting
- Have escape routes identified and make them know to your crew

## **CITIZENS BACK IN THE AREA**

**CIVILIAN REPOPULATION IN THE FIRE AREA**

### **Watch Out**

- Watch for unexpected vehicles and civilian foot traffic
- Power Lines are being re-energized in the fire areas
- Watch for distracted civilians driving through the fire area
- Vehicles will be moving in tight areas around residences, schools and parking areas

### **Mitigation**

- Use safety and hazard lights as needed. Practice defensive driving
- Treat all power lines as if they are live while working around power lines
- Provide back-up and spotter personnel – more than one may be needed
- Drive safely, wear seat belts and monitor fatigue when driving on and off the incident

# DETWILER INFORMATION

844-668-3473 / 844-MMU-FIRE

Media Line 562-619-7467

## MEDIA

California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection.

- The media may only access private property with the property owner's permission. Fire personnel cannot provide members of the media with authorization to enter private property.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO.
- Do not speculate or give opinions
- There is no such thing as an "off the record" comment.

## CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691)

Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask. **Do not post:**

- Inappropriate information, pictures or videos
- Opinions regarding the incident or policy
- Endorsements of any kind

## PICTURES AND VIDEO OF INCIDENT

We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

## LOST AND FOUND

The Information staff will manage *Lost and Found* items for the incident. If you have lost an item, leave your contact information and what you have lost at the Information trailer. If you have found an item on the incident, bring the item to the Information trailer.

## MAIL SERVICE

The Information staff will assist you in receiving letters and packages.

Mailing address for Detwiler Fire personnel to have mail sent to:

# "Detwiller" CAMMU 014474 Incident Fireline Suppression Repair Plan

## I. Objectives

The objective of the Suppression Repair Plan is to mitigate possible adverse effects to resources resulting from fire suppression activities on the Detwiller Fire, in a manner which does not compromise firefighter safety. The mitigations described within this plan have been developed to apply to constructed fire lines, watercourse crossings, access roads, drop points, heli-spots and any other locations disturbed by fire suppression activities. A Repair Specialist will be assigned to ensure that work is done as required and according to the Emergency Fire Suppression Repair Plan. Additional specialists or equipment may be used if the need arises. Specialists will release equipment from the area when their work is completed.

## II. General Repair Guidelines

### A. Helispots/Staging Areas/Safety Zones

- 1) Re-contour to the original slope as requested by the Repair Specialist.
- 2) Remove soil, and/or breach berms so that runoff can be dissipated. Cross drain these areas to effectively dissipate water runoff.
- 3) Place disturbed vegetation, brush and trees, piled during line construction, on the surface of safety zones and open areas. This may be done with equipment or hand crews.

### B. Roads

- 1) Repair roads to pre-fire condition as requested by the Repair Specialist.
- 2) Re-establish existing berms where applicable.
- 3) Breach berms to facilitate drainage, where applicable.
- 4) Clean culverts plugged with soil and rock resulting from fire road use.
- 5) Remove all slash and debris from culvert inlets/outlets.
- 6) Blading or grading of roads may be necessary. Grading shall be done after all suppression repair work is completed for areas accessed by the roads being graded.
- 7) Where vegetative material was cut and deposited adjacent to permanent roads it shall be lopped and scattered to a depth within 30" of the soil surface.

### C. Firelines; Hand and Dozer

Install waterbars as described in the guidelines below. Waterbars are designed to intercept, slow and spread the precipitation run-off in order to reduce sediment transport and soil erosion. The idea is to move water off the fireline before it can build up enough energy to erode and transport sediment. Re-establish waterbars and rolling dips using pre-fire locations. Flatten berms along fire lines to match natural contours. Utilize cut vegetation for erosion control on steep dozer and hand lines.

#### Waterbar Guidelines:

- 1) Spacing: These spacing distances should be used as a guide. Judgment should be used in locating waterbars to minimize erosion potential. It may not be possible or necessary to place waterbars in steep or rocky areas. Install water-bars at the following recommended **minimum** intervals:

Fire line Gradient (% slope)	Minimum Distance Between Water-Bars (feet)
0 to 10	200
11 to 25	100
25+	50

- 2) Location: Locate waterbars at natural slope breaks or to take advantage of natural features when possible. Direct water to unburned areas, and/or resistant surfaces with high vegetation cover when possible. Waterbars should extend beyond the width of the trail and discharge into undisturbed areas, rocky ground, or filter areas well protected with slash and vegetative cover.
- 3) Depth and Width: Waterbars need to be cut into the ground surface; do not simply push up soil. On dozer constructed line waterbar depths should be at least 6 inches; total height from bottom of ditch to

top of waterbar should average at least 12 inches and not exceed 24 inches. On hand constructed line waterbar depths should be at least 4 inches; total height from bottom of ditch to top of water-bar should average at least 8 inches and not exceed 18 inches. The width of the waterbar channel should be enough to handle expected water flows and to avoid plugging when a normal amount of sloughing occurs.

- 4) Angle: Determine the average gradient in percent slope of the fire line being waterbarred. Add 5 to the average gradient. This approximates the angle in degrees for the water bar. Do not install water bars at an angle steeper than 45 degrees as this will increase water velocity rather than slow it down.

#### **D. Watercourses**

- 1) Watercourse crossings shall be dipped to original configuration. Waterbreaks shall be installed on each side of channel to divert flow off of trails prior to entering watercourse channel.
- 2) Remove all soil and debris that was placed in any stream channel. A Repair Specialist will review the site for acceptability. If all foreign material cannot be removed with heavy equipment, the material shall be removed by hand. The approaches to the crossing shall be sloped back to prevent future stream bank failure.

#### **E. Archaeological or Historic Sites (if discovered)**

- 1) All sites and potential sites shall be flagged and avoided.
- 2) Impacted sites will be reported to the Suppression Repair Specialist as soon as possible.
- 3) If sites are encroached upon, work will stop immediately and the Division/Group Supervisor or Suppression Repair Specialist will be notified.

#### **F. Other Repair Concerns**

- 1) Remove all trash from fire lines and other affected areas.
- 2) Repair, broken, damaged fences, and/or gates damaged as the result of the fire control operations will be repaired. (Note: Extent and condition of damage should be documented prior to repairs.)
- 3) Grade and water roads, as needed, that were used during fire control operations. Roads should be out-sloped with rolling dips where degradation of the road prism has resulted from fire control operations.

## TRAINING MESSAGE

Training Specialist Now located at Merced Fair Grounds inside of Sierra Hall next to Check-In. All Federal, State, and Local Government agency trainees working on position task books need to register with the training specialist in order to receive proper credit for your assignment. Bring your task book with you.

### TOPIC: WRITING EFFECTIVE PERFORMANCE EVALUATIONS

If you do not check in with the Training Specialist before Demob you will not be able to get credit for this incident. Please take a few minutes to come by and see the Training Specialist A.S.A.P.

Jonathan White (562) 324-1811

## CULTURAL MESSAGE

On this Fire, there are a significant amount of both prehistoric archeological sites and historical sites. The prehistoric sites could range from small rock outcrops with seed processing mortars or slicks to large seasonal camps. These could include more features like bedrock milling locations, midden soil (dark black colored soil), lithic scatters, and other surface artifacts.

There are a variety of historic sites as well. The most common are mining sites, historic camps, and railroad grades (mostly down near the Merced River). There could be metal can dumps, cement pads, mining equipment, glass, ceramics, and other debris.

**\*\*\*Be Careful if you encounter a former Mine in the Field\*\*\***

They pose environmental as well as physical dangers!

There could be only partially covered open vertical shafts. Be careful working in these areas. There also could be chemical residues that could be harmful.

Stay away if possible.

If you find any prehistoric or historic site not flagged, contact Herb Dallas at (951) 840-0004. Take a GPS point if possible or mark its location on a map. Report any mining hazards to the Situational Unit Leader. Flag the location in the field as well, if you feel it poses a danger to other field personnel. Take a GPS point.

**\*\*\*UPDATE\*\*\***

### Flagging Protocols

If you see either checkered (yellow and black on USFS land) and/or Hot Pink and White striped flagging on BLM, Private, or State Land, this indicates a cultural or natural area of concern is please. PLEASE do not park, stage, or excavate (Or collect artifacts) on these sites. You might see a combination of this flagging, the same rules apply. Thank you for your cooperation.

# FIRING OPERATION CHECKLIST

Location: \_\_\_\_\_

Date: \_\_\_\_\_ Time: \_\_\_\_\_

Firing Supervisor \_\_\_\_\_

## 1. Personnel Briefing

- ☐ Objectives
- ☐ Conditions (fire environment)
- ☐ Resource assignments identified
  - ☐ Firing personnel
  - ☐ Holding forces
  - ☐ Lookouts
- ☐ Ignition plan/sequence
- ☐ Communication Plan
- ☐ Contingency Plan
- ☐ Safety issues

## 2. Go / No-Go

- ☐ All personnel briefed
- ☐ Weather forecast reviewed
- ☐ Resources in place
- ☐ Lookouts posted as needed
- ☐ Anchor and termination firing points identified
- ☐ Communications systems in place
- ☐ Fire behavior forecast reviewed
- ☐ Escape routes and safety zones established and made known
- ☐ Adjoining forces/Air Attack notified

## 3. Approval Prior To Firing

- ☐ Division Supervisor
- ☐ Branch Director
- ☐ Operations

## 4. Other Notifications

- ☐ Other: \_\_\_\_\_
- ☐ Other: \_\_\_\_\_
